Bronze for Müller Apparatebau in EcoVadis sustainability rating

Kranzberg - Every year, the global company EcoVadis recognizes companies for their commitment to sustainability. This year, Müller Apparatebau underwent EcoVadis' renowned sustainability rating for the first time and achieved an excellent score of 59 out of 100 points. This was rewarded with the bronze medal from the renowned rating agency. This means that Müller is among the top 35 percent of all companies worldwide with a valid EcoVadis certificate.

Sustainability is not just a short-term trend for Müller, but an important part of the company's philosophy. The independent EcoVadis rating considers a total of 21 sustainability criteria in four subject areas. The categories "Environment," "Labor and Human Rights," "Procurement," and "Ethics" are based on international sustainability standards and are reviewed by experts. The overall rating takes into account factors such as CO₂ emissions, the careful use of raw materials, and energy consumption. Another important aspect is social responsibility and the conscientious treatment of people, also with regard to diversity and inclusion.

"This year's bronze award is a great recognition for us and our team. We are very proud of the result," says Josef Flörs, authorized signatory and Director of Sales & Service, and Christian Gratl, Director of Operations at Müller, adds, "With the EcoVadis medal, we are creating more transparency and trust between us and our business partners. Sustainability is an important and decisive factor for us, especially in our cooperation with our partners."

Müller, a manufacturer of flexible paper management solutions, continuously invests in optimizing its own products and processes. The 5S method, which leads to greater safety through order and cleanliness, has been established for several years. Müller has also set itself ambitious goals, particularly in the areas of "environment" and "climate protection." For example, Müller plans to introduce environmental management in accordance with DIN ISO 14001 in the near future.

About Müller Apparatebau GmbH

Müller, based in Kranzberg near Munich, stands for the most flexible paper management solutions for the automated processing of digital print products. From cutting, folding, and enveloping to verifying documents and dispensing plastic cards. Müller develops and produces almost all components itself, from mechanics and electronics to software.
